SUMMARY

AI/ML Engineer and final-year B.Tech student building production-grade GenAI and deep-learning systems: real-time voice agents, multi-agent LangGraph workflows, RAG and PyTorch models. Strong in FastAPI, PostgreSQL, Redis/Celery, Docker and AWS, with a focus on reliability and evaluation.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript
ML / Deep Learning: PyTorch, TensorFlow, Hugging Face Transformers, LSTM, Transformers, LoRA fine-tuning, XGBoost, ONNX
GenAI & Agents: LangGraph, LangChain, RAG, ChromaDB, Multi-Agent Systems, Prompt Engineering, LLM Routing/Failover, Prompt-Injection Defense, Groq, NVIDIA NIM, Gemini
Backend & Data: FastAPI, Flask, REST APIs, WebSockets, SSE, JWT Auth, Celery, Redis, PostgreSQL, SQLite, MinIO/S3, Agora RTC
Cloud & MLOps: AWS (EC2, VPC, IAM, S3, Secrets Manager, SSM), Terraform, Docker, Docker Compose, Git, Pytest, MLflow

EXPERIENCE

Jr. AI/ML Engineer | ElectraWireless Pvt. Ltd. (USA, Remote) *Jun 2026 – Present*

- Build and maintain the FastAPI backend and layered memory architecture (working, episodic, semantic, reflective) of an AI companion platform with voice subsystems.
- Deployed the AI model backend to an AWS staging environment provisioned with Terraform (EC2 with Elastic IP and encrypted EBS, VPC, security group, scoped IAM instance role); services run via Docker Compose.
- Manage credentials in AWS Secrets Manager, store artifacts in a private versioned S3 bucket, and access instances via SSM.
- Debug streaming and stale-state issues, tune prompts to reduce hallucinations, and design modular AI components and evaluation workflows.

Subject Matter Expert (AI/ML) | House of Couton Pvt. Ltd. (Remote, Part-time) *Aug 2026 – Present*

- Conduct AI/ML research and literature reviews; write research papers and technical content on emerging ML/GenAI topics; Reviewed 50+ AI/ML and Computer Science research papers and evaluated their practical implementations.

PROJECTS

Lively - Real-Time Voice AI Sales Agent (live app) github.com/anishsmit23/lively
Python · FastAPI · PostgreSQL · React · TypeScript · Agora RTC · Groq · NVIDIA NIM · RAG · WebSockets · Docker

- Built a real-time voice sales agent for lead qualification, objection handling, demo booking, CRM logging and human escalation.
- Implemented persistent deal memory, RAG over product/pricing data, and automatic LLM failover between Groq and NVIDIA NIM; tested on 50+ conversations incl. prompt-injection attempts.

SCP - Smart Coordinates Predictor (Trajectory Forecasting) github.com/anishsmit23/scp-smart-coordinates-predictor
Python · PyTorch · LSTM · Transformer · Social Pooling · nuScenes · TensorBoard

- Built an LSTM + Transformer encoder-decoder with social pooling and goal-conditioned decoder, predicting 6 future trajectories per pedestrian/cyclist from 10-dimensional motion features.
- Achieved ADE 0.615 m / FDE 0.919 m on nuScenes-mini (90.78% of predictions under 1 m ADE); trained with AMP, checkpointing and early stopping.

Skin Lesion Segmentation & Classification (B.Tech Major Project) github.com/anishsmit23/Skin-disease-DL-Framework-Project
Python · PyTorch · timm · Albumentations · OpenCV · scikit-learn · ISIC 2018 · HAM10000 · PH2

- Built a PyTorch pipeline for lesion segmentation (Attention U-Net, TransUNet, FAT-Net) and 7-class classification (ConvNeXt-T, EfficientNetV2-S, DINOv2), compared under an equal training budget with bootstrap CIs and significance tests.
- Segmentation: TransUNet reached Dice 0.914 / IoU 0.854 on ISIC 2018 and 0.918 Dice zero-shot on PH2. Classification: top-2 soft-vote ensemble reached 92.8% accuracy, 0.880 macro-F1 and 0.974 melanoma AUC.

Rozgaar AI - Async Multi-Agent Job Application Pipeline github.com/anishsmit23/ROZGAAR-AI
Python · LangGraph · FastAPI · Celery · PostgreSQL · Redis · ChromaDB · MinIO · Groq · Docker Compose

- Architected a 5-agent LangGraph pipeline (discovery, ranking, resume, email, tracker) on an 8-stage PostgreSQL state machine; Celery + Redis workers run scoring, LLM calls and uploads asynchronously.
- Per-user ChromaDB collections for job ranking, JWT-scoped data, SSE task streaming; Pytest coverage up from 48% to 73%.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning | Sikkim Manipal Institute of Technology, Sikkim *2023 – 2027 (Expected)*
Minor: Industry 4.0.
Coursework: ML, Deep Learning, NLP, Computer Vision, DSA, DBMS, Operating Systems, Probability & Statistics.

ACHIEVEMENTS

- Finalist, Agora Conversational Agentic Hackathon: team selected among the top 35 of 900 teams across India.
- Amazon ML Challenge: our algorithm achieved F1 score above 95%.
